The Fight for Pay Equity: A Federal Road Map
Updated March 2018

In 2016, median annual earnings in the U.S. for men working full time, year-round were $51,640, compared to just $41,554 for women. That means women were paid just 80 percent of men’s earnings — a gap of 20 percent. The gap narrowed over the past half-century, but progress has stalled in recent years. Yet, the Equal Pay Act has not been updated since 1963. Immediate legislative and executive actions are needed to enable women to bring home the pay they have rightfully earned.

Pass federal bills advancing pay equity. Congress must take action to close the gender pay gap by passing legislation that will enable all women to take home a fair paycheck.

- The Pay Equity for All Act would prohibit employers from asking about salary history before making a job offer.
- The Fair Pay Act would require employers to provide equal pay for work of equivalent value.

Implement and enforce agency actions. Agencies must take action to help identify and close the gender pay gap by implementing meaningful executive branch actions.

- Prohibit retaliation against employees of federal contractors who discuss or disclose salaries.
- Collect summary pay data by gender, race and ethnicity through the EEO-1 form.
- Ensure more salaried employees receive appropriate overtime pay.

Michigan: Tell your member of Congress you want fair pay!

The Fight for Pay Equity: A State Road Map for Michigan

In 2016, median annual earnings for men in Michigan were $50,869 compared to $39,825 for women — an earnings ratio of just 78 percent, or 32nd out of all states and the District of Columbia. The gap is worse for most women of color and moms. As efforts stall at the federal level, states can enact legislation to help women and families at the local level.

Equal Pay. Employers must provide men and women with equal pay for equal work.

Cover All Employees. Public, private, and small business employers are all covered, no exceptions for those covered by the federal Fair Labor Standards Act.

Offer Protections. Protect employees from intentional and unintentional discrimination.
- Employer can’t retaliate or discriminate against individuals involved in legal proceedings to enforce the law
- No retaliation or discrimination against employees who discuss their wages
- State contractors must comply with nondiscrimination laws
- Employers can’t reduce another employee’s pay to comply with the law
- Pay discrimination hotline
- Employers can’t request salary history
- Employers must post a salary range in job advertisements
- Employers can’t provide less favorable career opportunities or tracking based on sex (mommy tracking)

Clarify Employer Defenses. Employer defenses should be well-tailored and narrow to ensure pay disparities only exist in appropriate situations.
- Employer defenses must be job-related, a business necessity, and not based on a sex-based differential
- Defense does not apply if there is an alternative employment practice available
- Agreement for lesser wage is not a defense

Establish Strong Legal Procedures and Remedies. Appropriate protections will incentivize employers to pay an equal wage to begin with in order to avoid litigation.
- Employer is liable for damages
- Class actions or joint claims permitted
- Attorney’s fees, experts’ costs, and other litigation costs covered by employer
- High fines act as a deterrent; increased fines for employers who have multiple violations

Take Preemptive Action. Employers and the state must act to investigate and close the pay gap.
- Employers must keep records of wages
- State provides education programs on pay disparity
- State collects and publishes data on the pay gap from all employers
- State creates an advisory committee on pay equity

Comparable Worth. Employers must compensate men and women equally for jobs that are comparable but not identical and provide guidelines for designating jobs as dominated by one sex, race, or national origin.
